

Arjun Raj

Java Full Stack Dev

Bengaluru, India | P: +91 9606290226 | arjunraj2k3k@gmail.com
LinkedIn: [linkedin.com/in/arjun-raj-8882801b7/](https://www.linkedin.com/in/arjun-raj-8882801b7/) | GitHub: github.com/arjunraj79

Education

Moodlakatte Institute of Technology, Kundapura

CGPA: 7.0

B.E. | Computer Science and Engineering

2025

- ❖ Coding Club Mentor – Organized and conducted Competitive Programming sessions for junior students
- ❖ Master of Ceremonies – Hosted various annual college events and functions
- ❖ Represented the college in cultural and academic forums, while also participating in industry-academic interaction sessions organized by the Confederation of Indian Industries (CII).

Internship Experience

SDE-1 Intern | KodNest, Bangalore | On-site

Feb 2025 - Present

- ❖ Acquired practical proficiency in Core Java, Python, SQL, and MongoDB through training, concurrently honing skills in Data Structures and Algorithms (DSA), Manual Testing, and Aptitude.
- ❖ Developed an AI-Assistant using spring boot, Gemini API, created a chrome extension to fetch the framework content of gmail and used API calling to fetch and retrieve data.
- ❖ **Skills:** Languages: Java (Core), SQL | Frameworks & Libraries: Spring Boot, Django | Web Technologies: HTML, CSS | Databases: MySQL | Core Concepts: Data Structures & Algorithms (DSA), Manual Testing
Soft Skills: Verbal Communication, Written Communication, Presentation Skills, Team Collaboration

Python Developer Intern | CyberSafeX, Noida | Remote

Dec 2024 - May, 2025

- ❖ Worked on a secure web-based Vulnerability Assessment and Penetration Testing application that automates vulnerability scanning, provides detailed vulnerability reports, and suggests remediation strategies.
- ❖ Gained hands-on experience in API development, web application troubleshooting, and full-stack collaboration, strengthening backend and frontend expertise in a real-world setting.
- ❖ **Skills:** Languages: Python, JavaScript | Frameworks & Libraries: Django | Web Technologies: HTML, CSS, RESTful APIs | Databases: MongoDB

Technical Projects

Smart Email Assistant - Inbox Summarizer & Responder

<https://github.com/arjunraj79/SmartTone-Assistant>

An AI-powered Smart Email Assistant that helps users manage their Gmail inbox intelligently. It reads email content via a Chrome Extension and uses Gemini (Google's LLM) via Spring AI to summarize, classify, and generate smart replies.

Technologies used:

Spring Boot, Spring AI & Gemini

VAPT API - Basic Automated Vulnerability Scanner

<https://github.com/arjunraj79/VAPT-API-for-Automated-Vulnerability-Scanning>

Automates vulnerability assessments with checks for port scanning, security headers, and SQL injection. Designed for integration into security workflows.

Technologies used:

Python, Django, REST framework, Postman

Skills

Technical Tools and Technologies:

Java, Python, SQL, Spring Boot, Django, HTML, CSS, RESTful APIs, MySQL, MongoDB, Git, GitHub, Postman

IDE : VS Code, Eclipse, IntelliJ

Applications : Docker, Nmap, Wireshark, Zap, AWS-Basic.

OS : Linux , MacOS, Windows.

Certifications & Training:

IBM Cybersecurity, Network Security, CompTIA Security+ and CYSA+, Firewall Implementation, Network Intrusion Detection, AWS Cloud Services (IAM, EC2 instances), NPTEL-Cybersecurity & Privacy, Foundations of Cybersecurity (Google).

I hereby declare that the above information is true and up to date.
